

Activité orale

Travail à deux : Il / Elle a quel âge ?

Write down a list of eight to 10 random first names on a sheet of paper, then write the same list on another sheet. Give one sheet to your partner, who will give you the one s/he has prepared. On the remaining sheet, write numbers indicating the ages of these people (up to 20).

Take it in turns to ask each other the ages of the people on the sheets. When you are finished, compare the two sets of sheets to check if they are correct.

Example:

- Kevin, il a quel âge ?
- Il a douze ans. Et Penny, elle a quel âge ?
- Elle a dix-huit ans.

Pierre a quinze ans.

Alain a quatre ans.
